

Pedicure

A Pedicure is a therapeutic treatment for your feet that removes dead skin, softens hard skin and shapes and treats your toenails. A good foot treatment is heaven, but pedicure techniques can vary from the type of polish to massage so it's important to find the right pedicure for you. Pedicures are a great way to ensure you look after your feet!

A regular pedicure can support chiropody if you suffer from foot problems, this may prevent you from needing further treatment it can also help your posture – you naturally walk more comfortably on cared-for feet.

Pedicures can also soothe and relax you when combined with other treatments. Once your pedicurist has massaged several softening and soothing creams into your feet, you may feel you are walking on air!

Anti-Aging Facial Galvanic Spa Treatment

As we age, our skin gets thinner and dryer. It loses collagen, which gives it a thick, plump appearance, and elastic, which makes it snap back quickly. The time it takes for healthy young cells to migrate to the topmost layer slows down, which makes skin duller looking. And our faces are more exposed to the elements and results in appearance of lines and creases from all the facial expressions we make.

The secret to such youthful looking skin lies in Nu Skin's innovative science. The device utilises a self-adjusting galvanic current often seen in professional spas to help deliver anti-ageing ingredients to the skin. The secrets to radiant, youthful-looking skin lies at your fingertips – and unlocking them has never been simpler.
